

Microsoft® SharePoint® Solutions

ALK Solution provides development, customization, and consulting services for Microsoft SharePoint. We are ready to customize your SharePoint websites and website collections in line with your business requirements, integrate SharePoint with your existing IT system and develop web pages, web parts, lists, and workflows using Windows® SharePoint Services architecture.

Rely on us for expert consulting on the deployment of SharePoint solutions. We help you select the appropriate version (WSS or Microsoft Office SharePoint Server), analyze your server topology, define security measures, and create websites and website collections based on your company structure.

Our development and consulting services for SharePoint solutions include:

- Implementation of web pages, web parts, lists, and workflows
- Customization of websites and website collections
- Version management
- User and rights management
- Integration with existing IT systems and Office applications
